

Publications récentes

- [1] [2008] M. Saidane, C. Lavergne, “*An EM Based Viterbi Approximation Algorithm for Mixed-State Latent Factor Models.*”, Communications in Statistics - Theory and Methods, to appear in vol. 37, issue 17.
- [2] [2008] M. Saidane, C. Lavergne, “*A New HMM Learning Algorithm for Event Studies : Empirical Evidence from the French Stock Market*”. AERB Applied Economics Research Bulletin / e-journal published by the Berkeley Mathemarketics Group - USA - Vol. 1, Fall 2008, pp. 1-30.
- [3] [2008] Lavergne C., Martinez M.J., Trottier C., “*Empirical Model Selection in Generalized Linear Mixed Effects Models*”, Computational Statistics, DOI10.1007/s00180-007-0071-y, vol 23, N°1, p 99-109.
- [4] [2007] M. Saidane, C. Lavergne, “*Conditionally Heteroscedastic Factorial HMMs for Time Series in Finance*”, ASMBI Applied Stochastic Models in Business and Industry - John Wiley Ltd, Vol 23, p503-529.
- [5] [2007] M. Saidane, C. Lavergne, “*A Structured Variational Learning Approach for Switching Latent Factor Models*”, AStA Advances in Statistical Analysis - Journal of the German Statistical Society - Springer Berlin / Heidelberg - V 91 N° 3, pp. 245-268.
- [6] [2007] M. Saidane, C. Lavergne, “*Learning and Inference in Switching Conditionally Heteroscedastic Factor Models Using Variational Methods*”, in Recent Advances in Stochastic Modeling and Data Analysis (Editor : Christos H. Skiadas), World Scientific Publishing Co Pte Ltd, pp. 312-321.
- [7] [2007] Lavergne C., Martinez, M.J., Trottier, C., “*Finite mixture models for exponential repeated data*” RR Inria, 18 pages.
- [8] [2006] M. Saidane, C. Lavergne, “*On Factorial HMMs for Time Series in Finance.*” The Kyoto Economic Review 75(1): 23-50.
- [9] [2006] M. Saidane, C. Lavergne, *A Generalized Pseudo-Bayesian EM Algorithm for Switching Dynamic Factor Analysis*, IJCSNS : International Journal of Computer Science & Network Security, Vol 6 N° 5, pp. 30-37.
- [10] [2006] Devictor, N. , Jacques, J., Lavergne C. “*Sensitivity Analysis in presence of Model Uncertainty and Correlated Inputs.*” Reliability Engineering and System Safety 91 1126-1134.
- [11] [2006] SPARK Study Group, “*Clinical and economic results of bilateral subthalamic nucleus stimulation in Parkinsons disease*” Journal of Neurology, Neurosurgery, and Psychiatry 2006;77:443-449; doi:10.1136/jnnp.2005.077677, <http://jnnp.bmj.com/cgi/content/full/77/4/443>.
- [12] [2006] M. Saidane, C. Lavergne, *Conditionally Heteroscedastic Factorial HMMs for Time Series in Finance*, In Alfredo Rizzi and Maurizio Vichi (Eds.), Proceedings in Computational Statistics, 17-th Symposium of IASC, volume17, Roma. Physica-Verlag Heidelberg New York, pp. 1557-1564.

[13] [2006] M. Saidane, C. Lavergne, “*Learning and Inference in Mixed-State Conditionally Heteroskedastic Factor Models Using Viterbi Approximation.*” Lecture Notes in Computer Science, Springer Berlin / Heidelberg ; pp. 372 - 379.

[14] [2006] M. Saidane, C. Lavergne, “*Factor Analysed Hidden Markov Models for Conditionally Heteroscedastic Financial Time Series.*” RR Inria-5862, 48 pages.

[15] [2005] Celeux G., Lavergne C., Martin O. “*Mixture of linear mixed data for clustering gene expression profiles from repeated microarray experiments.*” Statistical Modelling; 5:243-267.

[16] [2005] M. Saidane, C. Lavergne, *Modèles à facteurs dynamiques et à structure markovienne cachée pour les séries financières conditionnellement hétéroscédastiques*, Les cahiers de la recherche de ISC Paris, Section Formalisation et modélisation, pp.273-300. URL: <http://www.iscparis.fr/la-recherche/publications/crisc/index.html>

[17] [2005] Gonçalves, P., Lavergne C., Lenoir, C., / Heymes, C., Swynghedauw, B., *Statistical Modelling of Cardiovascular Data. An Introduction to Linear Mixed Models*, RR Inria-5787.
